Privacy-i

Mail-i

Somansa is a company who specializes in Enterprise DLP

From the endpoint to the network, Somansa can monitor and record all sections of the company's confidential and personal data to prevent outside leakage.
Somansa DLP solutions can be deployed in either a cloud version or an on-premises version.

Privacy-i

Endpoint DLP Privacy-i

Key Feature

Identification of company's data security status

Minimize the risk in case of a data breach by storing minimum personal data through scanning, destroying, or encrypting unattended personal data on the PC and deleting unnecessary personal information files.

Data leakage prevention

Protect data by controlling and recording endpoint (PC) events where information can be leaked to printers, removable storage media, messenger, WebMail, and cloud.

Somansa Privacy-i monitors and scans for confidential data on desktops and laptops based on pre-defined and customizable content-aware detection methods and policies.
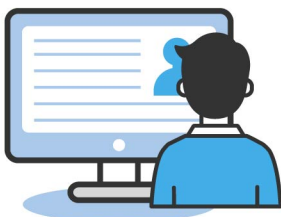

Admin

Set Policy rule for Blocking
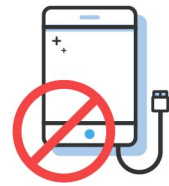

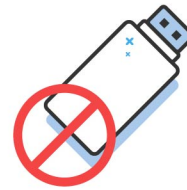

Blocked Devices

>> Scans and locates sensitive data on desktops and laptops based content aware detection methods and policy rules.

>> Monitors/Blocks copying and saving/downloading of confidential files based on policy rules.

>> USB drives, CDs/DVDs, and other removable storage devices.

>> Wi-Fi, Bluetooth, Airdrop, Thunderbolt and Printing.
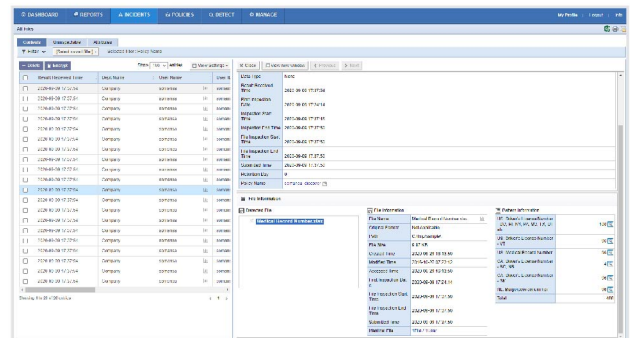

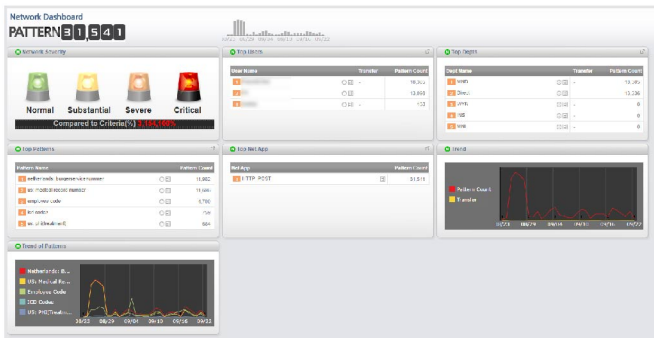

Mail-i

Network DLP Mail-i

Key Feature

Network data loss prevention solution by monitoring data in motion through web-hosted mail, webhard, social networking, instant messengers, P2P, shared folders, etc.

Equipped with SSL/TLS traffic decryption function that cannot be blocked by existing solutions, SSL/TLS-based web services such as Google/Apple/Office365/Dropbox can be controlled.

Even if Privacy-i is not installed, disabled or set to an old version, data leaked from individual PCs can be controlled and blocked at the network gateway.

Somansa Mail-i provides organizations with an advanced Network Data Loss Prevention (DLP) solution to protect sensitive data in Motion using its powerful Monitor, Discover, Security-Prevent, and Management features.

>> **Data Loss Prevention**
Mail-I protects sensitive data and personal information by monitoring sensitive data in motion, Email, Cloud Services, IM, SSL/TLS, SNS, etc.

>> **Regulatory Compliance**
Mail-i helps organizations comply with regulatory compliance requirements including GDPR, PCIDSS, GLBA, HIPAA, SOX to protect personal data such as Social Security Numbers, Credit Card Numbers, and Medical Records.

>> **E-Discovery**
